## School electricity

This week in pupil voice we have been talking about the electricity we are using in school and how we can limit the cost. We have been round all of the classes to see who turns their lights, board and computer off when not using them. We checked during assembly and although some teachers where in the class rooms, they had turned their lights off but still had one or two on for safety reasons.

Here are the results

**Seedlings** some of the lights were on and the computer was also on, but in the hive none of the lights were on.

In **Sunflower** there were no lights on although the computer was left on.

In **Poppy** class they had their lights, board and computer were off.

We have also checked the **photo copier room** and the lights were left on.

**Juniper** class had both their board and laptop on.

**Pumpkin** class had most of the lights off although Miss Perrin was in there having a meeting with a govenor so she had one light on because of safety reasons.

**Library** children were in the library but they were shutting down the computers.

**Star Anise** Children and staff were using room so everything on.

**Barley**- Teacher using room but only side lights on.

**Remember not to waste electricity !!!**
